## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 31-35 are rejected under 35 U.S.C. 102(e) as being anticipated by Lau et al. (6015429). Fig. 15E shows a tubular component **230** that is creased or folded such that it the forms a triple lumen portioned device. Fig. 22 shows the tubular device is folded or creased such that it forms quadruple lumen portions. The examiner is interpreting the claimed limitation "creasing a portion..." in this way: Chambers 21st Dictionary states "creasing" is defined as: forming a line by folding. Claims in a pending application should be given their broadest reasonable interpretation. *In re Pearson*, 181 USPQ 641 (CCPA 1974). See also *In re Morris*, Fed. Cir. 1997 127 F3d 1048, 1054,1055. Thus it can be said that at least one longitudinally disposed indent is formed via folding.

### ***Allowable Subject Matter***

Claims 36-39 are allowed.

### ***Response to Arguments***

Applicant's arguments filed 2/21/07 have been fully considered but they are not persuasive. Applicant states that Lau discloses "folding" and thus it is not "creasing". However, the Examiner as mentioned above considers these

terms to be analogous. In response to applicant's argument that Lau's device is used differently than Applicants invention, the recitation of use of the claimed invention is not present in the claims and a comparison of uses of the apparatus is irrelevant to patentability. The claims are directed to a method of making, not of uses. Lau's tubular component clearly has multiple lumens for easier insertion into a vessel. The claims are not directed to providing multiple lumens for use as fluid flow paths as this would be included in a method of using.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
